I. WAGE AND SALARY EARNERS IN EMPLOYMENT

1. The figures relating to employment published in this section are estimates. They are obtained from three main sources, namely, (a) monthly data as to persons employed in factories as shown at annual Factory Censuses; (b) current monthly returns from government bodies; and (c) current Pay-roll Tax returns (generally monthly). There are also some other direct records of monthly employment (e.g., for hospitals).

Data from these sources have been supplemented by estimates of the number of wage and salary earners not covered by the foregoing collections.
2. Interim estimates of the number of employees in factories are replaced each year by the actual monthly number of employees as recorded at successive annual Censuses of Factories. Substitution of Factory Census figures each year entails the adoption of new figures for "Total Manufacturing", "Total Private Employment" and "Total Employment" (males, females and persons), in all tables affected, and consequential revisions in the estimates for subsequent months. The numbers of factory employees for months subsequent to June, 1961 are estimated and are subject to revision when the Factory Censuses for 1961-62 and ensuing years are tabulated.
3. The purpose of the estimates of employment in this section is to measure, as nearly as may be with available data, current monthly trends in employment in the defined field. They are compiled on an enterprise or establishment basis, and therefore do not cover exactly the same area of industry as do the relevant industry tabulations of the General Population Censuses of 1947 and 1954, which are based on the returns of individual employees. However, it is possible that the results of the Census of June, 1961 may show the need for some revision of the figures for non-factory employment.
4. The terms "Employment", "Number Employed", "Employees" and "Wage Earners" used herein are synonymous with, and relate to, "Wage and Salary Earners" on pay-rolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include some persons working part-time.
5. Pay-roll Tax returns at present are lodged by all employers paying more than £200 a week in wages (other than certain Commonwealth Government Bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1962). This Act, when originally introduced in 1941, required employers paying wages of more than £20 a week to lodge returns. The exemption limit was raised to £80 a week from 1st October, 1953 and to £120 a week from 1st September, 1954. The present exemption limit of £200 a week was introduced as from 1st September, 1957.
6. Wage earners in rural industry and female private domestics have been excluded from all tables in this section. Because of the limited coverage of Pay-roll Tax returns in these two fields, accurate estimation of the numbers employed is not possible.
7. Particulars for each month from June, 1947 to June, 1960 for the principal series in this section were published in the bulletin "Wage and Salary Earners in Employment, June, 1947 to June, 1960", 9th February, 1962.

- (a) Includes the Northern Territory and the Australian Capital Territory.
- (b) The figures shown represent the actual monthly employment in factories as recorded at successive annual Censuses of Factories to June, 1961 with interim estimates for subsequent months. In this connexion, a factory is defined as an industrial establishment in which four or more persons are employed, or in which power, other than manual, is used. The employees covered are those engaged in manufacturing activities and exclude those engaged in selling and distribution, etc.
- (c) Includes employees in industrial establishments outside the scope of the definition of a factory (given in (b) above) and persons employed by factory proprietors but engaged in selling and distribution, etc., who are excluded from figures shown opposite "Factories". Includes employees in factories in the Northern Territory and the Australian Capital Territory.
- (d) Includes repairs, etc. See also notes (f) and (g) below.
- (e) Includes Law and Order; Religion and Social Welfare; Other Community and Business Services; Amusement, Sport and Recreation; Hotels, Personal Service, etc. (excluding female private domestics).
- (f) Includes persons employed on private building, and employees of private employers contracting to government bodies, on construction, alteration, maintenance and repair of buildings.
- (g) Includes employees engaged in the construction and maintenance of roads, bridges, earthworks, etc., and employees directly employed by government bodies on the construction and maintenance of buildings.
- (h) Figures for April - July, 1962 affected by industrial disputes.

NOTE: - The figures shown for June, 1961 represent actual employment as recorded at the 1960-61 Census of Factories. From July, 1961 the figures are interim estimates derived from monthly Pay-roll Tax returns and other direct collections and are based on particulars of employment at June, 1961. These interim estimates are subject to revision when the Factory Censuses for 1961-62 and ensuing years are tabulated.

A factory is defined as an industrial establishment in which four or more persons are employed, or in which power, other than manual, is used. The figures include employees engaged in manufacturing activities, and exclude those engaged in selling and distribution, etc.

II. EMPLOYMENT IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau. The survey, which was first instituted for New South Wales and Victoria in January, 1952 and extended to all States from January, 1953, covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees.

The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment.

Employers co-operating in the survey are asked to supply the number of employees on their factory pay-roll as at the last pay-day in the month. All persons engaged in the factory or on the factory office staff, providing their employment is directly related to manufacture, are to be included, but selling and distribution staff are to be excluded.

Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate tables have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.

The table showing employment in industrial groups includes particulars for only the five mainland States. Figures for Tasmania cannot be included because of the possibility of disclosing individual factory particulars.

In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.

IV. AVERAGE EARNINGS AND RATES OF WAGE

TABLE 16. - AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID AND AVERAGE EARNINGS (a)

The following figures are derived from employment and wages and salaries recorded on Pay-roll Tax returns, from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. The figures are not seasonally adjusted. Seasonally adjusted quarterly indexes of average earnings are shown in the table on the next page.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory. (d) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States the same ratio has been used in each State. Because the actual ratio may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE:- Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

(a) See footnote (a) to previous table. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The "All Industries" index is based on Pay-roll Tax returns and other data. (c) The index for manufacturing industries for the years 1949-50 to 1960-61 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual Factory Censuses. The figures for periods subsequent to June, 1961 are interim estimates based on Pay-roll Tax returns and are subject to revision when the Factory Census for 1961-62 is tabulated.

NOTE: - The index numbers for "All Industries" and "Manufacturing" show the movement in average earnings over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups.

MINIMUM WAGE RATE INDEXExplanatory Notes

The following six tables contain particulars of weighted average minimum wage rates payable to adult males and adult females as prescribed in awards, determinations and agreements. The wage rates are for representative occupations within each industry, the occupations being weighted, in the main, according to the occupation structure existing in the base year (1954).

Weighted averages of the components of the total minimum wage rate, i.e., basic wage, margin and loading, are calculated separately for employees covered by Commonwealth awards, etc. and for those covered by State awards, etc. Relevant definitions are as follows:-

"Commonwealth awards, etc." include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements.

"Margins" are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors.

"Loadings" include industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index.
